

THE LEADING SOURCE FOR CONCRETE-RELATED INFORMATION

VIRGINIA READY-MIXED CONCRETE ASSOCIATION

2015

Membership Directory

VIRGINIA READY-MIXED CONCRETE ASSOCIATION

VRMCA is the communications link for the ready-mixed industry across Virginia. Not only representing the ready-mixed industry in Virginia before the General Assembly, design professionals, state agencies, and the public, but also by passing on good management and sales ideas.

We are also the source for answers to your questions - from how to promote, to help on personnel matters. We provide information to industry executives about technology and efficient business methods, and promote the use of concrete through the Virginia Ready-Mixed Concrete Advisory Council and local Councils.

GOVERNMENT RELATIONS

VRMCA's registered lobbyists represent the industry before the General Assembly, state agencies, and Virginia's Congressional representatives on all matters that affect the ready-mixed industry. The Association monitors all new legislation, regulatory proposals, and highway department policies. VRMCA's lobbyists have over 40 years experience with the General Assembly and state agencies.

PROMOTION

The Virginia Ready-Mixed Concrete Advisory Council spreads the word about quality concrete and its applications. Our Directors of Industry Services assist ready-mixed producers with sales and marketing and promotion. These representatives provide valuable information to architects, engineers and developers for technical assistance and cost information on paving materials and parking lot designs. The Council offers combined know-how and experience with concrete not available elsewhere in Virginia through its Regional Promotional Councils.

2014-2015 BOARD OF DIRECTORS

PRESIDENT

Jay McNeely

STALITE Provides Benefits

For any concrete project

- Consistent Properties
- Easy pumping and placement
- Enhanced durability and reduced permeability

For Bridges

- Reduced stiffness for less deck cracking
- Improved structural efficiency
- Reduced foundation loads

For Buildings and Structures

- Longer floor spans
- Smaller foundations, girders and columns
- Improved fire resistance

Internal Curing for all types of concrete

- More reliable and complete curing
- Reduced early age cracking
- Small reduction in density
