

CASE STUDY

Kellam High School, Virginia Beach

Completed: 2014

Size: 330,000 SF / 13,000 yards of concrete

Owner: City of Virginia Beach

Architect: HBA

General Contractor: S. B. Ballard

Attributes: This K-12 project involved a design process that included the community. The goal was to ensure the school was designed as a tool for project-based learning and that is incorporated sustainable building practices. It consists of six connected communities, library, stadium and a courtyard with a waterfall.

Awards:
