Charlottesville

IX. Adjournment

ANTITRUST STATEMENT

This Association assigns the highest priority to full compliance with both the letter and the spirit of the antitrust laws. It is thus vital that all meetings and activities of the Association be conducted in a manner consistent with that policy.

Agreements among competitors that restrain or limit competition are unlawful under the antitrust laws, and violators are subject to criminal fines and incarceration, civil fines and private treble damage actions. Examples of such illegal agreements by competitors are agreements to fix or stabilize prices, agreements to allocate territories or customers, and agreements to limit production or output. Accordingly, it is inherently risky and potentially improper for competitors to discuss at Association meetings or activities, or otherwise, the subject of prices, terms and conditions of sale, markets, individual customers, individual company costs and other elements or factors that may affect competition.

It is important to bear in mind that those in attendance at Association meetings and activities may include competitors. Any discussion of sensitive antitrust subjects with one's competitors should be avoided at all times before, during and after any Association meeting or activity. If at any time during the course of any meeting or activity the Association staff believes that a sensitive topic under the antitrust laws is being discussed, or is about to be discussed, they will so advise and halt further discussion. Member attendees at any meeting or activity should likewise not hesitate to voice any concerns they may have in this regard.
